

LAYER3 Managed Remote Access Service

Enhance Employee Productivity With Round The Clock-access To Corporate Resources

Layer3's *SECUREConnect™*, a Managed Cloud-based Secure Socket Layer (SSL) Virtual Private Network (VPN) service, gives your employees and partners a secure, seamless way to access the

corporate resources they need to get their work done-from anywhere in the world and on the mobile devices they're already familiar with, such as laptops, tablets, and smartphones.

Simplify IT

Business owners and IT administrators need a proven, integrated SSL-based secure access solution that can be rolled out rapidly and managed with ease. With Layer3's Remote Access Service, businesses eliminate the need to buy or manage a remote access system. Instead, Layer3's team of experts handle the implementation and day-to-day management, freeing up your IT resources.

Solution Summary

- Helps to reduce complexities and risks by enabling higher-performing remote access
- Facilitates cost savings with a pre-existing, cloud-based infrastructure and managed service model
- Supports your unique needs with more flexible and scalable options

Remote SSL VPN - How it works

Remote Access SSL VPN services enable employees to use almost any web browser to securely connect to a network from any location. This technology helps businesses support a remote workforce by providing employees access to email, data, and network resources, regardless of an employee's location.

BENEFITS

SUPPORT A MOBILE WORKFORCE.

Give employees access to corporate assets from anywhere, at anytime

REDUCED TOTAL COST OF OWNERSHIP

Say goodbye to unwieldy, up-front capital expenses. Layer3 manages and maintains the equipment installed on its secure MPLS network

SCALABILITY

Get started with as few as 5 users and easily add more users as your business requires

SECURITY

Leverages strong SSL-based encryption. Endpoint security check to ensure remote device meets set security standards before granting access

SECURE ONLINE MEETING

Hold secure online meetings, presentations and share desktops

Predictable costs: based on users, not hardware

Incorporates enterprise authentication tools and integrates with corporate standards and infrastructure (leverages existing Active Directories such as LDAP, Radius e.t.c.)

Works on any device (PC, Mac, Tablet, Smartphones)

24/7/365 networks monitoring, management and support

Control users' access at a granular level, including their identity, the network they're connecting from, and even how secure their device is.

Ensure your business can continue to operate in the event of a disaster

Central policy management

Very simple to use: accessible from every browser

FEATURES

- Runs on award-winning Juniper SA & MAG series gateway
- Secure meeting and desktop sharing capability
- Endpoint security management
- Multi-platform support
- Standard service-level agreements
- Premium service-level agreements
- 24/7 level-2 technical support provided by skilled network technicians
- 24/7 proactive monitoring and incident notification with advanced analytics technology
- Web portal access with service management and infrastructure reporting
- Service management
- Fault management

The Layer3 Advantage

Layer3 has years of experience designing, deploying and supporting complex networks. Our solution lets you tap into a robust cloud-based infrastructure that facilitates easier management and requires virtually no capital expenditures—helping you save both time and money. We can offer varying SLAs, security and multiple feature options to support your unique needs. By choosing our solution, you can access our wide variety of services, world-class service delivery, consistency and peace of mind. We offer the following advantages:

End-to-End Infrastructure

Our privately managed MPLS network provides exceptional performance, total redundancy, and the flexibility to deliver true Quality of Service.

Complete Service Portfolio

We offer a full range of business data, network, security and hosted IT services.

Unbeatable Experience

We have been serving some of the most demanding businesses with innovative services for 7 years and have the highest industry technical certifications within the region.

Superior Customer Support

Our friendly technical experts respond quickly and efficiently 24/7/365.
